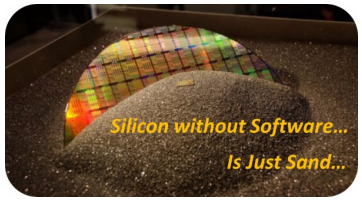
imperas Revolutionizing Embedded Software Development

## Imperas Newsletter: December 2017

**"Silicon without software is just sand."**



### From Simon Davidmann, CEO Imperas

**Happy holidays!** from all of us at Imperas, and thanks for your support in making 2017 a record-breaking year.

We have experienced great growth in the adoption of virtual platforms, notably in automotive and security-related embedded systems and

software, and RISC-V processor models and SoCs.

In 2018, we will be delivering more: more of the fastest processor models; more tools for software development, debug and test; and more expansion of the Imperas ecosystem.

We look forward to continuing to work with you! Please follow Imperas on LinkedIn, twitter @ImperasSoftware and YouTube.
